

“Our Greenstar customers need not worry about the fate of their recyclable materials in these tough economic times. We are maintaining our promise to renew our world with innovative, sustainable and reliable recycling solutions. All materials collected through our recycling programs will be sold to mills where they will be turned into new, valuable products that will help reinvigorate the economy.

Processing over 1.5 millions tons annually, Greenstar has secured many contracts with mills across the globe. This protect us from the volatile swings in the marketplace and ensures our customers that we will continue to move and sell their recyclables.”
